Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Manke et al (5411097).

Manke et al. disclose a tool in a wellbore comprising: pump chamber 90; piston 74 in the chamber and moved by a differential pressure between an internal fluid or mud pressure and an annular pressure during a discharge stroke (col. 2, lines 47-48; col. 7, lines 18-21); and the piston moves in the discharge stroke when exposed to a higher pressure (col. 7, lines 22-23).

Allowable Subject Matter

Claims 5-42 are allowed.

Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments, see page 15, filed 1 December 2005, with respect to the rejection of claims 25 and 28-32 under 35 U.S.C. 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new rejection is made in view of Manke et al. Since the rejected claims do not positively recite formation testing, Manke et al. is considered pertinent. The wellbore-penetrating-a-formation limitation is not the same as a fluid inlet penetrating the formation.
